**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Independent claim 1 is more specific than subsequent dependent claims regarding the thickness/lambda values. Claim 1 notes that this value is "at least approximately 0.05", while the other claims broaden this to ranges which include values not approximating 0.05, thus the dependent claims are not further limiting in this aspect but broadening, which broadening renders the claims indefinite.

***Allowable Subject Matter***

Claims 1-20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to show or fairly suggest the combination of the electrode material, substrate material and thickness/wavelength ratio claimed by the applicant.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited reads on some aspect or aspects of the claimed invention.
